

M1A2 SEP Vulnerabilities

Threat Model

Threat Capabilities

Conventional Operations

Internal Security

Local, Regional, National &
Secret Police
Para-military Organizations
Civilian Mobilization

Regional Threats

Armored and Mechanized Forces
Long Range Artillery and Rockets
Fixed and Rotary Wing Air Forces
UAVs and Night Vision
Medium Range Missiles
Coastal Navy
HUMINT/SOF

Access Denial

IO

Transition Operations

Transition

Engineers
Pre-positioned - logistics
Hardened C2
Deception

Protecting Regional Gains

Armored and Mechanized
Forces
Regional Police
Rotary Wing Air Forces
HUMINT/SOF

Access Denial

Air and Missile Defenses
Theater Ballistic Missiles
Chemical/ Biological
Weapons
HUMINT/SOF

Strategic Operations

Information Operations: EW, cyber-
attack, protection and security
Diplomatic initiatives
Economic leverage
Terrorist attacks
Precision strike - TBM
Weapons of Mass Effects

Unconventional Operations

Preservation

Camouflage, Concealment,
Cover Deception and Denial
Redundant C2

Access Denial

Counter - precision, ISR &
mobility

Controlling the Conflict Environment

All Elements of National
Power

Precision Fires & Recon
Strike

Mobile/ Mechanized Reserves
Commercial Technical ISR

Changing Operational Environment

Physical Environment:

- Prescribes nature of the conflict & nature of forces that fight
- Urban areas growing 3 times faster than population
 - 60% of world's population will live in cities
 - Urban warfare virtually assured
- Urban settings degrade U.S. technological and platform based superiority, limit precision strike and maneuver
 - More manpower versus "system centric"
- Human issues add complexity
- Increased Govt / NGO / PVO / criminal influence
- With increased urbanization, adversary use of urban/complex terrain to gain advantage and offset US force capabilities highly likely

Emergence of "fighters" vs soldiers:

Not organized in the traditional sense

- Primarily defending their ethnic group, religion, clan or tribe
- Emergence of a "Warrior Class" whose desire to fight and kill exceeds their desire to live
- In the fight for the "long haul"
- Unconstrained ROE vs. US constrained ROE
- Increasingly includes criminal & terrorist elements

M1A2 SEP Technical Vulnerabilities

Precision/highly lethal weapons

Improved KE Munitions

Air/Artillery delivered HPM

DPICM/TGSM

ATGM/RPG

Tandem HEAT

Mines

WMD/E

NBC

Flame

Non Lethal Weapons

Laser

HPM

Other Threats

GPS Jamming

Integrated EW Attack

Physical Attack of C2

Vulnerabilities extend beyond bombs → and b

Attacking M1A2 SEP Non-Technical Vulnerabilities

Purpose

- Exploit complex environments
- Preserve combat power while sapping the enemy's will and capability to fight
- Cause casualties
- Neutralize technological overmatch
- Deny access and avoid losing

Patterns of Operation

- Conventional, asymmetric and adaptive
- Both offensive and defensive
- Dispersed, decentralized & distributed
- Control tempo and conflict environment
- Interdict APODs /SPODs

Non-linear Operations

OPTEMPO

Threat Identification

Threat RSTA

Terrorism

Sustainment

Sharing the night

Complex/Urban Terrain

Vectors

Humanism

Information Operations

Threat CCD

M1A2 SEP Threat Implications

M1A2 SEP Operational Environment Highlights

- A wider spectrum of operations, increased threat technological capability and unpredictability leading to a more **complex and challenging range of operational environments**
- In association with an Adaptive and Adoptive Threat

- A Challenge to independent maneuver
- Complex and difficult maneuver support requirements
- Enhances necessity for Combined Arms Operations
- Extremely lethal close combat environment
- Degradation of U.S. technological superiority
- Changed target sets
- Challenges U.S. preferred method of attack... long range precision attack
